Shreya Das

Aspiring Full-Stack Developer | Backend APIs, React, and Scalable Web Applications
Bangalore, India | +91 8965807402 | shry.ds03@gmail.com | GitHub | LinkedIn | Portfolio

SKILLS

Frontend: Next.js, React, JavaScript, Socket.io, React Router, Axios, Context API, HTML5, CSS3
Backend: FastAPI, REST APIs, JWT Auth, SQLAlchemy, Pydantic, Express, WebSockets
Databases: PostgreSQL, MongoDB, SQL
AI: OpenAI API, LangChain, RAG, Prompt Engineering, Embeddings, AI Agents, MCP
DevOps / Tools: Git, Docker, AWS, Alembic
Languages: Python, C++, C, JavaScript
Automation / EIE: PLC Programming, MATLAB, LabVIEW, IR Sensors, Robot Control

EXPERIENCE

GenAI Intern — ViH Labs and Innovation *(June 2026 - Present)*
•Built an AI recruiter assistant with FastAPI, React, PostgreSQL (pgvector), and AWS S3, optimizing LLM token usage through a hybrid retrieval and context-packing pipeline.
•Developed an ASR evaluation pipeline using Faster-Whisper and Word Error Rate (WER) for transcription benchmarking.
•Implemented backend observability using Grafana, Prometheus, and Loki for metrics, log aggregation, and alerting.

PROJECTS

Demo Social Media App — React, FastAPI, PostgreSQL, SQLAlchemy, JWT, AWS S3 | Website Link | GitHub
• Built a full-stack social media app with authentication, feeds, profiles, comments, likes, and post management.
• Managed global app state with React Context API and integrated REST APIs using Axios with loading, authorization, and optimistic updates.
• Developed the backend with FastAPI, PostgreSQL, SQLAlchemy, JWT, Alembic, and AWS S3 image uploads with validation and UUID-based filenames.
AI Agent Console — Next.js, TypeScript, WebSockets, Node.js | GitHub | Live Demo
• Built a real-time AI chat client with streaming responses, tool-call support, and automatic reconnection.
• Implemented sequence-based message ordering and deduplication to handle out-of-order and duplicate events.
• Designed resumable WebSocket streaming to recover conversations after network interruptions.
Sensor-Guided Robotic Positioning System for Stereotactic Applications — Epson VT6L, Python, CAD, IR Sensors, Robot Control |GitHub
• Built a low-cost CAD-to-robot positioning workflow.
• Applied fiducial registration and coordinate mapping to generate robot poses.
• Integrated IR sensors with Python and robot communication for movement validation.

EDUCATION

M.S. Ramaiah Institute of Technology
B.E. Electronics and Instrumentation Engineering (2023 - 2027)
CGPA: 8.74

HACKATHON / EXTRA-CURRICULAR

MSRIT Intra-College Hackathon — Participant
- Built a full-stack women's community platform using React, Node.js, Express, MongoDB, JWT, Multer, Axios, and Cloudinary, enabling secure authentication, video uploads, and resource sharing.

CodeRIT Club — Member
- Participated in coding discussions, peer learning, and practical project-building activities.

CERTIFICATIONS

- **Docker Foundations Professional Certificate -** LinkedIn
- **Express Essentials: Build Powerful Web Apps with Node.js -** LinkedIn
